

# **G-PPE™** **QUICK REFERENCE GUIDE**

## Firefighter Detox & Cellular Defense

### WHAT IS G-PPE?

- G-PPE is a transdermal glutathione delivery system
- Designed specifically for firefighters and first responders
- Absorbed through the skin—no IVs, no pills
- Manufactured in California, USA
- Developed by *Nobel Prize–nominated scientists*

### WHAT IS GLUTATHIONE?

- The body's master antioxidant
- Naturally produced by the liver
- Detoxifying PFAS & heavy metals
- Reducing oxidative stress
- Supporting immune function
- Protecting cells from *cancer-causing damage*

### WHY FIREFIGHTERS NEED IT

- Firefighters face elevated exposure to:
- PFAS ("forever chemicals")
- Heavy metals
- Combustion byproducts
- VOCs and carcinogens

### WHY TRANSDERMAL G-PPE?

- Bypasses the digestive system
- Avoids first-pass liver breakdown
- Delivers glutathione directly into systemic circulation
- Higher bioavailability than oral supplements
- Practical alternative to IV glutathione

### IMPORTANT NOTE

**G-PPE** is designed to support the body's natural detox pathways.  
It **does not replace PPE, decontamination, or medical care.**

### FOR MORE INFORMATION

Internal studies and firefighter-focused research are ongoing.  
Ask your department or study coordinator for details.
